

## PRODUCT DATA SHEET

### Conica sospensione

“Conica” is a domestic lamp that helps to create an ambiance and possesses a distinct character. Considering the domestic setting, it seems opportune to create a lamp that reinterprets a known typology. Thus the design concept starts with the idea of an old-fashioned light, recalling a classical lampshade that contains the light beam within a cone shape.

“Conica” consists of two cones, one placed inside the other and each different in shape and material. The inner cone is made of black nickel aluminium while the outer is made of transparent borosilicate glass with a sandblasted rim at the bottom. Both cones work together to shape, direct and diffuse light.

The lamp takes advantage of the low temperature light source (LED) and, combined with a flexible tube covered with black nylon, allows it to be handled and moved to a desired position.
