

Invisible Side Tokujin Yoshioka

A piece of clean, linear, minimal design, the aesthetic synthesis of the designer's Japanese culture. Invisible Side is a multi-functional product, light and elegant which can be easily transformed into a side table or a bench and is at home not only in the various home environments (from living room to bedroom) but adapts to the various functions demanded by contract. Invisible Side today comes in two transparent versions (crystal and smoke) and two matte versions (white and black). This piece belongs to a collection of transparent items designed for Kartell by Tokujin Yoshioka.
