Chouchin, suspension

design Ionna Vautrin 2011

Chouchin is a family of suspended lamps that takes its name from traditional Japanese paper and bamboo lanterns used as light and bright signs outside restaurants and bars, or as lucky charms outside homes. Their typical shape have been reinterpreted in a pure contemporary style, using an age-old material: blown glass that has been painted to make it completely opaque and glossy from the outside. The result combines a warm colouring, textured and precious, with a luminous collar that projects

an intense, direct beam of light downwards. The family includes three shapes, each with its colour: orange for the large version, grey for the small version and green for the elongated one. The shape and shade accentuate the individuality of each model, coloured in tones that combine beautifully with each other when used in multiple compositions.

multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 6 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case.

The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.

Materials: lacquered metal

Colours: white
