## Magneto, floor design Giulio lacchetti 2011

Magneto is an essential and functional lamp featuring an invisible power: the magnetic field of a magnet. Indeed, the project focuses on a spherical magnet which combines two simple elements: a support rod with a round base and a compact LED light source, similar to an electric torch or a microphone, affording the utmost versatility of angling and movement along the rod.

Magneto teams the flexibility of use of a lamp suitable for infinite solutions with absolute formal and functional simplicity. The intense, concentrated and focused light can be directed down onto a small area, such as a book, a magazine, or a computer keyboard, or it can be directed up to create an atmosphere filled with suggestion. Hence, a multitude of usage requirements can be accommodated: from reading to diffused lighting.

Magneto is available in two sizes, as a table lamp or a floor lamp, and in two colours, grey and red, to distinguish different spaces and moments: from offices to lounges, living rooms and bedrooms. At all times featuring a special, strong yet subtle, attractive and seductive personality, in a word: magnetic.

## Magneto, floor technical info

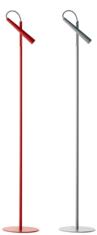

# FOSCARINI

#### Description

Reading lamp with direct light. Batch-dyed ABS diffuser with incorporated LED, epoxy powder coated steel base and rod. The "super magnet", spherical in shape and made of "rare earth" comoulded with a thermoplastic elastomer, acts as a joint and allows you to direct the torch and slide it vertically along the rod. The black cable, fitted with an ON/OFF pedal, runs visibly along the inside of the rod.

Materials: lacquered stainless and ABS

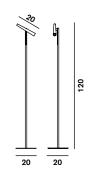

Colours: red, grey

Brightness direct light directable

<u>Weight</u> net kg: 2,80 gross kg: 3,60

Packing vol.m<sup>3</sup>: 0,021 n.boxes: 1 Bulbs - LED 1x2,4W 2700° Kelvin

Cable length
