A light chair with essential lines, austere, consistent with the minimalist, sophisticated style of its designer, Piero Lissoni.

Lizz now comes in a matt version as well in six colours, suggestive of the typical connotations of Scandinavian design where the use of natural materials is preponderant. Made of batch-dyed technopolymer thermoplastic, Lizz is produced in a single piece using the gas blow moulding process. Created to be used around the table, this new scratch-proof, weather-proof variation is particularly suitable for contract use.
