

La Marie Philippe Starck

The world's first completely transparent chair made from a single polycarbonate mould, La Marie combines essential design with an exceptionally robust structure to produce the lightness and intangibility of its image.

An ingenious combination of lightness and strength, the result of painstaking and meticulous research on its polycarbonate material, this item is shock resistant. In addition to the crystal version, La Marie is available in four additional fluorescent shades: violet, light yellow, light orange and pinky orange.
